OBJECTIVE

Computer Science undergraduate seeking an entry-level position in Data Analysis or Data Science. Strong foundation in data analysis, machine learning, and information systems, with hands-on academic and personal projects using Python, SQL, and analytical tools. Motivated to transform data into actionable insights to support data-driven decision-making.

EDUCATION

Université du Québec en Outaouais (UQO)

Honours BSc in Computer Science

Gatineau, QC

Sep. 2023 – Apr. 2026

- Relevant coursework: Data Structures, Algorithms, Cybersecurity, Introduction to Data Science.

Collège Universel

Diploma of Collegial Studies in Natural Sciences

Gatineau, QC

Aug. 2021 – May 2023

TECHNICAL SKILLS

Languages: Python, Java, SQL (MySQL, SQL Server), JavaScript, HTML/CSS, R

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Hugging Face, Tesseract OCR

Tools & Frameworks: Git/GitHub, Android Studio, VS Code, IntelliJ, Firebase, Jupyter Notebook

PROJECTS

Université du Québec en Outaouais (UQO)

Information Systems Analyst / Data Analyst

Gatineau, QC

Oct. 2025 – Dec. 2025

- **Wine Data Analysis & Classification** – academic project using Python, Scikit-learn, and Matplotlib.
- Performed exploratory data analysis (EDA) using PCA and correlation analysis to identify key features.
- Built, trained, and evaluated supervised learning models (KNN, Logistic Regression) achieving up to 95% accuracy.
- Applied data preprocessing techniques including normalization, feature selection, and missing value handling.
- Validated models using cross-validation and compared dimensionality reduction methods (PCA vs LDA).
- Produced analytical visualizations and a structured technical report to support data-driven conclusions.

Personal Project

Data Analyst / Machine Learning Analyst

Feb. 2025 – Apr. 2025

- **AI Anime Recommendation System** – personalized recommender using collaborative filtering and NLP techniques.
- Collected, cleaned, and analyzed large-scale datasets (10,000+ records) using Pandas and NumPy.
- Applied transformer-based language models to generate semantic embeddings from textual descriptions.
- Implemented cosine similarity to deliver real-time, personalized recommendations.
- Developed an interactive web interface using Gradio and documented the project with a complete GitHub README.

Personal Project

Web Systems Analyst / Frontend Developer

Nov. 2024 – Dec. 2024

- **Personal Portfolio Website** showcasing academic and personal projects in a recruiter-friendly format.
- Designed and deployed a responsive website using HTML, CSS, and GitHub Pages.
- Applied modern UI/UX principles and optimized performance, accessibility, and SEO.
- Maintained version control and deployment workflows using Git and GitHub.
- Portfolio URL: brabra6.github.io/portfolio_brabra

Personal Team Project

Information Systems Developer / IT Analyst

Sep. 2024 – Dec. 2024

- **PC Order Management App** – Android application for managing hardware orders and inventory.
- Developed full CRUD functionality using Java, Firebase, and Android Studio.
- Implemented Firebase Authentication, role-based access control, and optimized real-time database interactions.
- Designed responsive XML-based user interfaces and applied Android lifecycle best practices.
- Collaborated within a small team using GitHub for version control, branching, and code reviews.
